CURRENT APPOINTMENTS

Assistant Professor

University of Illinois Urbana-Champaign

Aug 2022 – Current

I co-lead the [Distributed and Storage Systems Laboratory \(DASSL\)](#).

PAST APPOINTMENTS

Postdoctoral Researcher

VMware Research Group

Aug 2020 – Aug 2022

Postdoctoral Researcher

University of Wisconsin Madison

Aug 2019 – Aug 2020

Affiliate Researcher

VMware Research Group

Feb 2023 – Oct 2024

EDUCATION

Ph.D. in Computer Sciences

University of Wisconsin – Madison

2019

Advisors: Andrea C. Arpaci-Dusseau and Remzi H. Arpaci-Dusseau

Thesis: Protocol- and Situation-Aware Distributed Storage Systems

M.S. in Computer Sciences

University of Wisconsin – Madison

2018

B.Tech in Information Technology

Coimbatore Institute of Technology, Anna University, India

2010

HONORS & AWARDS

RESEARCH IMPACT

LazyLog. The ideas from our LazyLog paper have been adopted and implemented in Confluent WarpStream ([Link](#)), a data-streaming platform.

Corruption-tolerant Replication. The CTRL protocol from my FAST '18 paper has been adopted and implemented in TigerBeetle ([Link1](#), [Link2](#)), a financial database, making it resilient to storage corruptions and errors. This work has also influenced systems at Facebook ([Link](#)).

ErrFS and ErrBench. ErrFS is a user-level FUSE file system that systematically injects file-system faults. Ideas from ErrFS have been adopted by other popular testing tools. ErrBench is a suite of distributed-storage-system workloads which drives systems to interact with their local storage. Through ErrFS and ErrBench, we have exposed many serious bugs in popular distributed systems such as ZooKeeper, Cassandra, and Kafka.

PACE. PACE is a framework to systematically generate and explore persistent states that can occur in a distributed execution, exposing crash vulnerabilities in distributed storage systems. PACE found 26 serious, real-world bugs in popular systems including ZooKeeper, Redis, etcd, and Kafka. Many bugs found by PACE have been fixed by developers.

ALICE. ALICE is a crash-consistency testing framework that I helped build. ALICE has been adopted by others (including an open-source version). ALICE found several real-world bugs in 12 widely used commercial storage software products, including Google's LevelDB, Git, and SQLite.
